## Model 101-H Hydraulic Operating Table

The Ferno® Model 101-H Hydraulic Operating Table allows quick height and angle adjustments using the three foot pedals. Either end of the table may be raised or lowered to any position between 28½" and 40½" above the floor for easy preparation from a standing or sitting position. The table top is convex to drain fluids away from the body and an extra-deep trough runs the perimeter of the table, reducing the need for splash guards. A drain in the center of the foot end quickly eliminates fluids from the table. Four 8" swivel wheels lock instantly with a single foot pedal or one set of wheels locks directionally for easy rolling. Type 304 stainless steel with a #3 finish ensures easy maintenance and a solid surface base eliminates crevices where liquids can accumulate.

## Model 102 Folding Operating Table

The Model 102 Folding Operating Table is a true combination table, ideal for embalming, dressing and transferring. An exclusive, one-hand release easily adjusts either end of the table from 32½" to 38½" with the ends being independently adjustable. The table is constructed of a stainless steel top with a convex surface, tubular aluminum frame, and 6" wheels with ball bearings. The swivel wheels lock to keep the table stationary while in use. The drain, located in the center of the foot end, quickly eliminates fluid from the table. The Model 102 folds for storage when not in use and can stand on one end for storage behind a door or in a closet.

## Model 103 Combination Operating Table

The Model 103 Combination Operating Table is a multipurpose table, ideal for embalming, transferring and dressing. For added convenience, each end can be adjusted independently for individual working height and drainage.

The stainless steel top is durable and rigid, featuring a convex surface and deep side troughs for efficient drainage. Six-inch wheels with locks keep the table stationary while in use.
